

# PRODUCT SECURITY BULLETIN

December 2021

## Log4Shell Vulnerabilities Not Present in Abiomed Medical Products and Services

Abiomed is dedicated to ensuring the safety and security of our products worldwide and are closely monitoring developments related to recently published CVE-2021-44228 and CVE-2021-45046 identifying vulnerabilities in versions 2.0-beta9 through 2.12.1 and 2.13.0 through 2.16.0 of Log4j.

Abiomed's product security impact assessment has concluded that our products and services are not susceptible to the Log4Shell vulnerabilities found in Log4j.

Abiomed's product security and quality teams continue to monitor these vulnerabilities and will reassess as new information becomes available. We will follow our established processes for disclosure and mitigation of security vulnerabilities associated with our products and services.

At Abiomed, we believe in our Patients First mission and are committed to fully integrating cybersecurity into the products we provide and the processes we follow.

### ADDITIONAL INFORMATION

Customers interested in additional information about any Abiomed products should contact their Abiomed assigned account or customer support representative.

Abiomed is committed to ensuring the safety and security of our products. For more information on Abiomed's product cybersecurity program, please go to: <https://www.abiomed.com/product-security>
