# Spoofing Vulnerability Eliminated in Impella Connect® Cloud

Abiomed is dedicated to ensuring the safety and security of our products worldwide and has internally identified and eliminated a security vulnerability in our Impella Connect Cloud product. This vulnerability, if exploited, cannot lead to patient harm or exposure of patient data. To Abiomed's knowledge, this vulnerability has not been exploited.

Abiomed conducted an investigation and determined its only affected product was the Impella Connect Cloud. The vulnerability could allow an attacker to use a specially-crafted API call to launch a spoofing attack. The vulnerability was eliminated in Impella Connect Cloud v3.14.1.

Affected Products:

Product & Version	Recommended Response
Impella Connect Cloud v3.14	None; the Impella Connect Cloud has been updated to 3.14.1 worldwide and this vulnerability has been eliminated.

ABOUT IMPELLA CONNECT CLOUD

The Impella Connect portal is Abiomed's online device management system that allows clinicians and Impella support staff to remotely view Impella data. Users can view active Impella case pump data through intuitive summary dashboards, and select individual cases to view live video streams of the pump information transmitted from the Automated Impella Controller™.

ADDITIONAL INFORMATION

Customers interested in additional information about any Abiomed products should contact their Abiomed assigned account or customer support representative.

Abiomed is committed to ensuring the safety and security of our products. For more information on Abiomed's product cybersecurity program, please go to: ***https://www.abiomed.com/product-security***
