

Second Tuesday, every other month

Time:

Noon - 2 p.m. EST/EDT

9 - 11 a.m. PST/PDT

Virtual

Critical Care Transport

Transport Training for the Impella Device

Program overview

Join one of our critical care education transport specific educators in a virtual series on didactic cardiogenic shock and Impella management as it pertains to transport. All classes will be taught by a Flight Nurse/Paramedic on the critical care education team. The content is repeated on each date to allow flexibility in attending.

Program Objectives (AACN 2.75 CERPs)

- Cardiogenic shock and early identification
- Discuss traditional treatment vs. MCS treatment
- Impella device platform & management concepts
- Preparing for transport
- Patient management during transport
- Alarm troubleshooting
- Transfer of care
- Impella with additional therapies
